

BIMair improves performances thanks to a new laser marking and barcode scanning system - Datalogic

The plant BIMair based in Assen is a production site for air distribution systems - the first one in the world in which ductwork is produced automatically.

The plant BIMair based in Assen is a production site for air distribution systems. It is the first one in the world in which ductwork is produced automatically. What makes it special is that it has been simplified so far that people in BIMair can work with persons who are distanced from the labour market.

Plates are identified with a data matrix code. This code is important to know what treatment has to be carried out.

At the end of the day, you need parties that really get off the ground. So that's what they have been looking for partners.

This video shows the Datalogic's solution tailored for BIMair, to respond effectively to their demanding needs:
