Bologna 14 May 2009 - The Board of Directors of Datalogic S.p.A. - a company listed in the Star segment of the Milan Stock Exchange and a leader in the market for barcode readers, data collection mobile computers, RFID (radio frequency identification) systems and photoelectric devices - today approved the quarterly interim report as of 31<sup>st</sup> March 2009.

*"The first quarter results were penalised by the severe crisis that has struck the global economy - stated Mauro Sacchetto, Datalogic CEO. - The Company implemented all those necessary strategies not to burn cash using cost cutting actions without reducing expenditure on R&D or on the new plant in Vietnam (that will be opened the middle of July) in order to ensure more competitive products. The 1Q business result were exactly in line with this plan".*

1Q09 ended with consolidated sales revenues of € 73.1 million (mn), down by 24% vs. € 96 mn for the same period in the previous year (1Q08).

EBITDA negative by € 515 thousand (€ 11.6 mn at 31st March 2008) and EBITANR negative by € 4.1 mn, decreased compared to € 8.7 mn recorded in the same period in the previous year.

The period's consolidated business result, which showed a net loss of € -5.5 mn (vs. a consolidated net profit of € 4.3 mn as at 31 March 2008, is attributable to the strong contraction in sales recorded in the first three months of the year; all main markets for Datalogic Group's products (industrial, distribution and logistics) were heavily affected by the crisis that, as from 4Q08, has struck the global economy.

The separate business Division sales (including intersegment sales) and segment results (before non-recurring costs/revenues and depreciation and amortization due to acquisitions) at 31st March 2009, are listed below:
