

DATALOGIC AT SITL 2021 PRESENTS ITS INNOVATIVE LOGISTICS SOLUTIONS - DATALOGIC

Paris, September 9th, 2021. Datalogic, a global leader in the automatic data capture and factory automation markets, will be showing during SITL 2021 (13th - 15th September) its complete solutions portfolio for making processes along the supply chain more efficient and more secure.

Visitors are invited to come to the Datalogic booth no. J77 in Pavillon 1 in Paris Porte de Versailles to get to know the latest technology for managing logistics applications automatically.

At SITL, Datalogic will unveil its smallest and lightest handheld scanner on the market, the HandScanner as well as its most advanced new mobile data terminal, the Skorpio™ X5 together with the PDA Memor™ 20 and finally the new industrial imager, Matrix™ 320.

Visitors will also meet the range of industrial stationary scanners, sensors and vision systems for all scanning and conveyor sorting needs, as well as its range of professional handhelds and PDAs for mobile data collection on site or on the road, and its range of high-performance handheld scanners and imagers for intuitive and high-speed 1D and 2D barcode reading.

Datalogic solutions meet the needs of transport and logistics operators to optimize all operations and processes within the supply chain.
